

## A World Leader - *Close to Home*

The UK Gill Heart Institute is proud to announce the addition of a brand-new flat-panel peripheral vascular lab. The Gill Heart Institute is one of the **first sites in the world** to offer this technology.

With a larger field of view using the digital flat panel technology, our physicians are able to take detailed, more comprehensive images of the peripheral vascular system, which means more accurate treatment for our patients.

**Debabrata Mukherjee, M.D.**, a specialist in peripheral vascular interventions from the Cleveland Clinic and the University of Michigan, will run this new service.

For more information, please call **(859) 257-1000** or **(800) 333-8874**, or visit [www.ukhealthcare.uky.edu](http://www.ukhealthcare.uky.edu).
