Mike Timperman, photographer – 859-221-9637

A&M Aerial Photography is based in Lexington KY. Our primary focus is to provide high quality, aerial, digital photography services to various clients in the central Kentucky area. Aerial photographs are taken from our remote controlled, unmanned helicopter which is powered by a very quiet electric motor. We use a Canon 20D professional digital SLR camera to capture the highest quality images.

Our remote-controlled, battery-powered, helicopter camera ship provides several advantages over a full-size helicopter. The photos are generally sharper since our remote controlled platform is able to get into smaller quarters and fly at lower altitudes than a full-size helicopter. Noise is a concern for some locations and our battery powered helicopter is whisper quiet. Overhead costs are relatively small resulting in substantial savings passed on to the customer. A typical photo shoot costs about 20% of what you would pay for a full-size helicopter to do the same job, delivering equivalent or better quality images. And we guarantee satisfaction.

Scheduling

In most cases, a few days notice is all that is required to schedule a shoot. Time permitting, rush jobs can be scheduled for an additional fee. Proof images can be delivered via email to you or your web designer by the end of the day.

On-site

Total time from on-site arrival of pilot & photographer to helicopter ready to fly (begin shooting) is usually about 20-45 minutes. Total flight time is approximately 10-15 minutes. Safety and weather limitations are at our discretion as we cannot fly in inclement weather!

Copyright

Please respect United States copyright laws. All of our images are automatically copyrighted when taken. Our business is to create and sell images. Photos posted on our web site are for sale. Contact us for a quote.

Target markets

Real Estate	Aerial photos of homes or commercial property add a unique perspective that can enable an agent to expand his/her reach to larger number and/or more interested buyers.
Insurance	Aerial photos offer a unique opportunity to document property and improvements and could make a difference in the event of a claim.
Inventory	Coal companies, power plants, salvage yards, etc. can use aerial photos to assess inventory.
Land surveys	Aerial photos can clearly display property lines and provide more complete documentation for the appraisal.
Golf courses	Aerial photos of signature holes, tournaments, club events, can be used for scorecards, web sites, hole-in-one plaques and other advertising or fundraising activities.
Landscaping	Aerial photos provide for unique portfolios for the landscaper. Aerial photos of pre-landscaped properties can be to demonstrate proposed improvements.
Local government	Aerial photos for traffic issues, planning and zoning, parks and recreation make excellent documentation for public meetings.
Homeowners	Aerial photos can be used to get a complete view of the surrounding property for documentation or fun. Send to family and friends over the internet.
Construction	Aerial photos can be used to document the construction project; site survey, groundbreaking, progress photos and project completion.
Media	Aerial photos for brochures, catalogues, hotels, restaurants, retail stores, magazines, newspapers, TV commercials & news, websites, etc.
Legal	Aerial photos can be used for accident investigation, land use determination, property line disputes, etc.
Gifts	Aerial photos make for a perfect housewarming gift or birthday present for homeowners.
